

While the effect is rich and striking, etched glass is difficult and costly to install and maintain. Altering etched glass is virtually impossible. And cleaning it can be problematic.

By contrast, LLumar® glass enhancement film creates the look of etched glass yet is infinitely changeable. Such flexibility can be especially important in leased spaces or commercial properties where changing company logos and signage mandate frequent updates. Once applied, LLumar® film can be wiped clean with conventional glass cleaner. And it is far more cost-efficient than etched glass.

### Customized To Complement Your Design

LLumar® decorative films are custom cut, spliced and finished to your specifications. Film can be applied to virtually any glass surface, as well as metal, panned, or other flat or cylindrical surfaces.

LLumar® glass enhancement film is available through the LLumar® national dealer network.

**About the Manufacturer:** CPFilms Inc. is the largest manufacturer of window film in the world. CPFilms is a wholly owned subsidiary of SOLUTIA, Inc. and are produced in an ISO 9001 certified facility.

# Fabulous ...

You can bring color and texture to virtually any glass window, door, or room divider. Subtly or sensationally. LLumar® decorative film puts multiple colors and patterns at your disposal: red, yellow, green, blue, bronze, white, black, matte, frost. Combine any or all to splash on virtually any color. Achieve any hue. Diffuse, focus, or block light completely.

You can customize a space with a corporate logo or signage. And choose from dozens of patterns to create enriching visuals; overlap multiple patterns to create signature effects.

# & Functional

LLumar® decorative film does more than enhance aesthetics — it serves vital functions, and can be applied to:

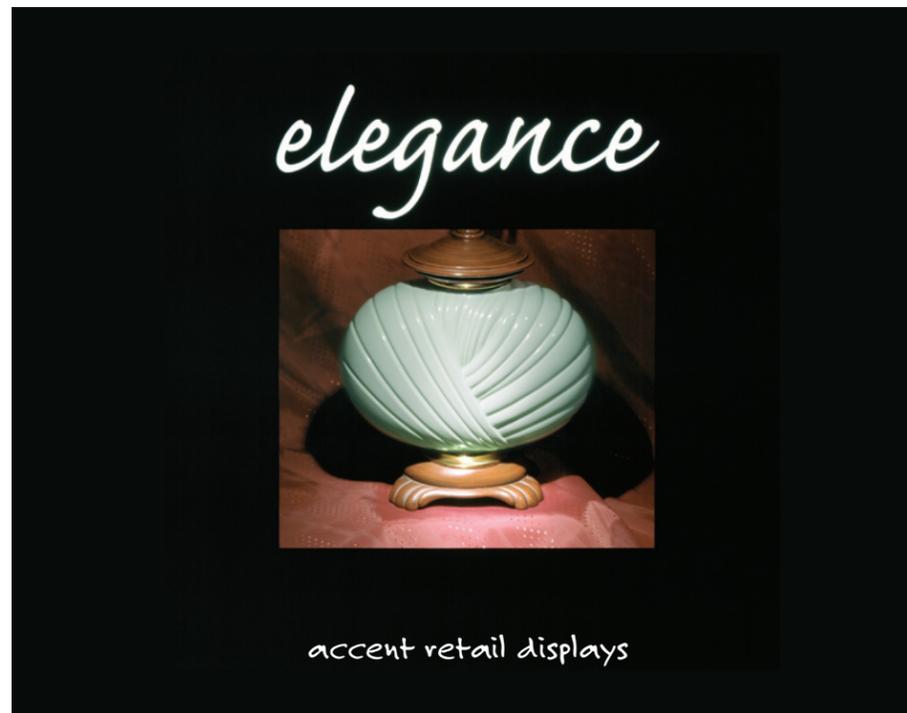

- glass partitions
- retail displays
- walkways
- office doors
- conference rooms
- private spaces

LLumar® decorative films can be used to:

- make glass surfaces clearly and beautifully visible
- to delineate passageways
- enhance safety in public spaces
- add flexibility to displays

LLumar® film can even add solar protection to sun-drenched spaces.

Achieve the look of fine etched glass, without the expense or permanence.

Whether you want to memorably reproduce a client's logo in a corporate entranceway, add new interest to a retail display, or cost-efficiently bring the beauty of etched glass to the front door of a client's residence, let LLumar® be your inspiration.
